Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 2 recites the limitation "first threshold and second threshold". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipate by Granovsky (5276430).

Granovsky shows a plurality of antenna patterns, see figure 1. The signals from these antenna patterns are logically OR'ed together using gate 28 to select an antenna pattern and determining the presence of the RFID device. In figure 18, Granovsky shows logically AND'ing the signals received from the plurality of antenna patterns in order to determine the presence of the RFID. It is noted that signals must be received over a threshold in order to be decoded. Granovsky includes both transmitters and receivers with each antenna pattern.
